Re: US Patent Applications 10/699,404

Dear Mr. Rooney:

I have recently inspected U.S. patent application 10/699,404, which issued as Pub. No. US 2005/0095359 A1 on May 5, 2005.

The IDSs filed in connection with application '404 fail to cite all of the information material to patentability of the pending claims. Specifically, I bring to your attention US patent 6,943,678 and application 11/476,434. Claim 10 of patent '678 is particularly relevant to the patentability of pending claim 23 of application '404.

I trust this new information will be cited in a supplemental IDS under § 1.56, and that your applicant will amend the claims to more particularly point out an invention.

In the meantime, if your client feels there may be some value in obtaining a license to claim 10 of patent '678 I would be encouraged to receive a reply.

Respectfully,

Scott Muirhead
